Subject: Re: Narrawallee Land Clearing . MOD3 MP06-0276 MOD3
Date: Monday, 8 April 2019 8:50:57 PM

Dear Independent Planning Commission,

I am writing to register my complete objection to further bad development in Narrawallee.

The recent destruction and wholesale clearing of Tall Coastal Forest in Leo Drive - Narrawallee; Illett St, Garside Rd, Matron Porter Drive - Mollymook and Dolphin Point areas is vandalism and poor planning.

- we need coastal tall forest protected . You cannot replace it with landscaping and street tree planting.
- we all know now in 2019, that taking down a tree canopy immediately heats up the local environment. (people are complaining about excessive heat)
- we all know that trees are carbon 'sinks' and oxygen makers.
- we all know that our human footprint has too much impact on the environment. (increased water runoff, loss of biodiversity, radiant heat from hard surfaces, loss of animal habitat etc etc)
- we also know that we need housing, but housing with better and more thoughtful planning - clever design ie. smaller "cluster" houses, common green space, passive solar, etc etc.
- we don't need the repetition of current urban "design" that ignores the environment.(people are complaining about the cost of heating and cooling).

Yours Sincerely, Robyn Russell.
