Subject: BioBanking Credit Calculator for the Ulan Modification 4 Longwall Optimisation Project

Hi Anthony

I have reviewed the BioBanking Credit Calculator for the Ulan Modification 4 Longwall Optimisation Project. I note that the calculator only requires 1 plot for each of the three vegetation zones. The assessor has included more plots than required. While I do not have access to the data sheets I am familiar with the general area and the plot data in the calculator is well within the range I would expect. I am comfortable that the Credit Calculator is an accurate reflection of the development area and that the resultant credit requirement is correct.

If you require further information please contact Samantha Wynn who returns from leave next Monday.

Cheers

David
