To Whom It May Concern,

I am writing this email in objection to the Chain Valley Colliery MOD 3 (SSD 5465) and Mannering Colliery MOD 5 (MP\_0611) Project expansion.

This expansion will have a detrimental impact on the surrounding areas which are at present, experiencing a large growth in housing and population growth being fuelled by young families moving to these areas. With an increase in the mining production causing an excessive amount of noise and air pollution, coupled with the increased running time and burning of the coal at the already outdated power station, this should not, and can not be seen as an answer to solve our power problems.

I can not voice my concerns strongly enough against this development taking place near these residential areas, this must be stopped and other power alternatives should be looked at by an independent commission or body.

Regards,

Jeff Scott
