Hi Lindsey,

I'm writing to correct a matter raised during the applicant's IPC meeting last Thursday. In relation to visual impacts from Northwood, it was noted at the meeting that access to residential properties was not obtained and that this was the reason for utilising a drone to undertake the visual impact analysis shown in the presentation. I'd like to clarify that access to some of the properties on the high side of Upper Cliff Road (15, 17 and 20a) was provided, however, there was insufficient time to produce the actual photomontages in time for the briefing due to prior commitments of the visual impact consultant. Therefore, the images previously taken using a drone were used for the analysis presented.

Prior to this, HammondCare undertook doorknocking of properties on the lower side of Upper Cliff Road where access was not either available or the resident confirmed that they had no real view of the hospital due to vegetation.

Kind regards,

Chris Forrester
