---

Thankyou for the additional material for my review and the opportunity for further comment in relation to the Mangoola Coal Continued Operations Project (SSD 8642).

The data provided on the contributing factors of air quality and the misconceptions of coal mine dust compared to say woodfired smoke are apparent from the results. I found the information provided to be informative however not to dissimilar to my current understanding of air quality in the Hunter Valley.

Overall the information provided underpins my support in favour of the Mangoola Coal Continued Operations Project (SSD 8642).

Regards,

Dallas Austin
