

# **SOLAR – A tsunami of infrastructure**

## **GLENALLEN SOLAR ‘FARM’**

**In Summary : The Department states that it has considered all of the matters in its assessment of the project**

### **MENU:**

**LAND REQUIREMENTS**

**CUMULATIVE AFFECTS**

**LAND USE – NOW AND TOMORROW**

**FOLLOW THE MONEY – BUT AT WHAT COST?  
WHO REALLY BENEFITS?**

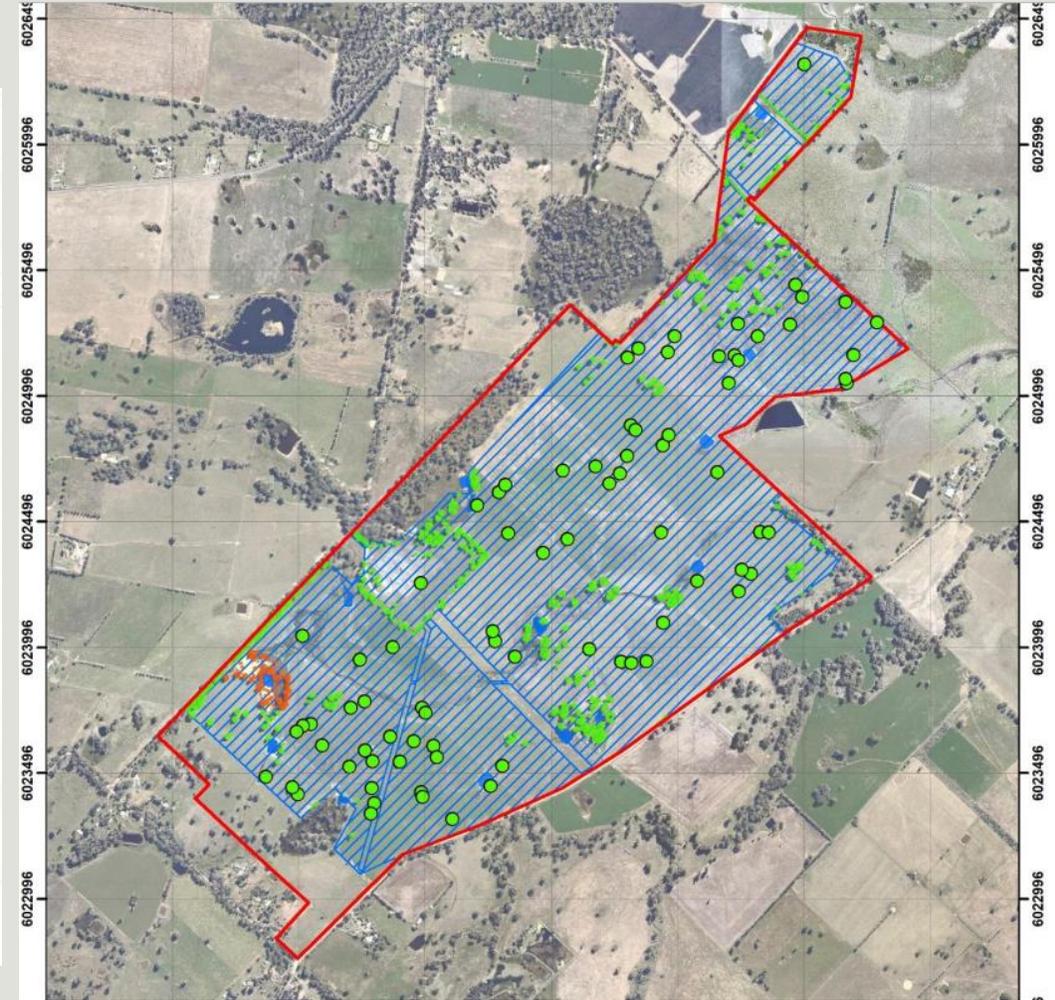

**SOCIAL LICENSE and DUTY OF CARE**

**DECOMMISSIONING – NOT ADDRESSED**

# GLENALLEN SOLAR 'FARM' – is this an appropriate land-use for a “FARM”

Plate 8 Survey Unit 6; looking 340°.

**1.1.2 Development Footprint The Proposed Development covers approximately 350 ha and is designated by the Development Footprint.**

**Should Australians continue to invest in large-scale energy that replaces biodiversity and farms, for the 'green renewable energy industry'**

**"SEGS" Solar Site**

Mirrors Collapse, and due to the possible radio-active waste floating around with the wind, will be too toxic to grow food, or rehabilitate.

**Solar needs purest quality silica in the form of sand mining,  
Some Islands off China have been mined out of existence.**

We think the spatial footprint is big for renewables. It is nothing compared to the minerals required

## 2015 ABC News reveals Toxic lake black sludge and human rights abuses – BAOTOU TOXIC LAKE for technology

Rare earth discharge liquid outflows from a pipe into a rare earth lake (China)

It is disturbing that this 2015 ABC evidence was presented, and yet in 2023, we are creating the end of nature, a sixth mass extinction, and our own civilization.

ABC news 2015 <https://abcnews.go.com/Technology/toxic-lake-black-sludge-result-mining-create-tech/story?id=30122911>

- **VISUAL AMENITY, FARMS AND ENVIRONMENT** is important to Australians.
- **There are better alternatives than large scale proposed policies that cannot be reversed.**
- **Adopt the precautionary principle and reject Glenallen Solar ‘Farm’**
