---

I object to the Bowmans Creek Wind Facility for the following reasons:

- lack of social license
  - biodiversity value of the region that stands to be destroyed.
  - visual amenity of the region will be destroyed.
  - health and well-being and visual and acoustic amenity of residents in proximity will be adversely affected.
- More broadly I object to the project on the basis that the industry is unregulated. They are able to produce 'independent' studies that are doctored, and the government regulatory process isn't independent given the huge push for RE in Australia.
- The cumulative impact of this large scale rush to wind has not been considered.

I object to the Bowmans creek wind facility.
