from
Lynette LaBlack

Dear Independent Planning Commission Panel,
Glanmire Solar Presentation:-

Thank you to the panel for hearing us today

All of the Principles of Ecological Sustainable Development are defied by Elgin Energy's 250,000 toxic classed Industrialised Solar Panel Electricity Generating Works + filthy Fire Inferno Risking incapable Battery Energy Storage System plan to provide pathetic, weather dependent, intermittent energy to the Grid.

Photo 1 - Industrialisation of rural NSW/Australia is NOT FOR THE GREATER GOOD!
There are NO benefits whatsoever to the

Local Community/to NSW/or to the Australian Public, the Economy or the Planet from this Environmentally Destructive plan for Industrialisation of rural NSW/Australia with inferior Stone Age electronic garbage as it will NEVER provide reliable, affordable power as required for basic electricity services for the people of NSW - with 2 days of rainy weather & no Solar output showing what a disaster reliance on the weather would be - makes it non-sensical to approve when far superior Reliable, secure, 24/7 Australian Power alternatives are readily available with a clean, safe Nuclear Power Future being the obvious option now being prioritised at COP 28 as we speak!

With an Environmental Footprint of only 1/75th of this Glanmire Solar's 160 hectares (395 acre) of the 186 hectare (459 acre) high quality cultivation land site - a comparable Nuclear Power Plant land take equates to only 2.1 ha or 2.5 ha for the whole site.

NONE of the Public Health & Safety Risks of Land/Water Contaminating Heavy Metals & the Ticking Time Bomb Battery with extremely toxic - carcinogenic & birth defect causing Solar & Battery Fire/Smoke Hazard Risks as well as Bisphenol A - lethal to young children - as toxic as blue asbestos - shedding from Wind Turbine Blades due to Leading Edge Erosion or astronomically costly multiplication of Transmission Lines are needed at all with an Australian Nuclear Power Future unstoppable.

It's no wonder that there have been thousands of people rallying in Sydney & on the Coast against Reckless RENEWABULLS - the Fake Green Solar/Wind Energy Poverty Grift & Ponzi Scheme/Scam - Including against Elgin's obnoxious Glanmire Solar plan.

Photo 2 & 3

Clearly Glanmire Solar has a plethora of detrimental, practical impacts, DOES NOT PROTECT NATURE as Minister Plibersek says she requires for Approvals - as we have repeatedly experienced with the heartbreaking loss of our precious ecological habitats in the Riverina.

Photo 4 The Hollow Log dumped on the ground is all that's left of Squirrel Glider & Superb Parrot habitat - now covered in weeds in the meant to be, useless vegetation screen perimeter.

Photo 5 The Potential loss of this precious, reliably productive Glanmire site as has already occurred in numerous other life sustaining, essential Food growing areas including my own pretty & productive Bomen/Eunony Valley district - **Photo 6 & 7**

now cursed by unmitigatable ruination of our visual amenity - **Photos 8, 9, 10, 11** - with dozens of climate cooling trees non-sensically felled, threatened species gone **Photo 12** (protest sign)- the Solar site overtaken by menacing weeds, & **Photo 13** (log in weeds) threatening industrialised electrification species invading **Photo 14** (Substation) subjecting us to Electrical Force & ElectroMagnetic Radiation & Cyber Security Risks with Solar Inverters produced in China - enabling our most hostile enemy the CCP to remotely disable Solar systems.

Australian Sovereignty & Independent Energy Control is obviously paramount which excludes Elgin's Glanmire Solar plan & all other renewable plans controlled by companies subject to the CCP's National Intelligence Law & based on unethical components produced by hostile actors.

We can't possibly continue to have dodgy companies enabling Beijing to Turn our Lights off & stitch up Power Purchase Agreements with massive Cyber Security Risks as is the case with FRV's clear Conflict of Interest Walla Walla Solar, Minister Bowen's \$100 Million Dollar Debt Financing of it with our Public Money & Microsoft's Power Purchase Agreement - incomprehensible when Microsoft claim to be helping protect Australia from Cyber Security threats by partnering with the Australian Signals Directorate! One has to wonder if this is intentional sabotage!

As is clearly seen by **Photo 15 & 16** the far too close proximity of Industrialised Solar subjects us to constant, costly weed seed burden, Solar water run-off & lack of productivity due to increased micro climate Heating - with the accurately researched Heat Island Effect impact not included in Elgin's plan - with the DPE continuing to verbal Professor Greg Barron Gafford's Shepparton Hearing interaction with Physicist Peter Hall - admitting the 30m figure disingenuously being used would not be commensurate with larger scale Solar & more research was essential to determine the greater extent.

Industrialised Solar like Elgin's plan has also placed us in an extremely hazardous position regarding toxic Solar Fire/Smoke Hazard risks - yet to be even researched by NSW Fire & Rescue. Clearly, like the disastrous April Cadmium Telluride Beryl Solar Fire at Gulgong & Oct 6th Tomago Graphite Block Fire - another Fake Green RenewaBULL Experiment inflicted on the people of NSW against our will - terrifyingly NSW Fire & Rescue have no idea of what to do or what to expect!

Quote:-

“There is a general lack of guidance and provisions in building codes, standards, and legislation in relation to safety to address the potential risks from these emerging technologies. Part of the problem is that we do not yet know enough about their probability of failure, their mechanisms of failure and potential consequences of failure.”

Photo 17 & 18 (Biodiversity offsets) - It is completely disingenuous that anyone is enabled to claim farcical Biodiversity Offsets promoted by Woke Corporates such as Westpac & Virtue Signalling through Power Purchase Agreements such as the City of Sydney, the Opera House, Kiama, Shoelhaven & Shellharbour Councils & Coles etc all based on unethical, cruelly tortured Slave Labour based **Photo 19** (Tortured Uyghurs) & Fake Green Sustainable Fudgery here at Bomen Wagga Wagga.

I DO NOT CONSENT TO Elgin's Contaminating Glanmire Solar/Battery plan as the RenewaBULL Scam is causing outrageously unaffordable electricity prices &

consequential Cost of Living Crisis that threatens our health & wellbeing - with heating & cooling unaffordable & basic Food staples such as this bread **Photo 20** reliant on ever Skyrocketing Electricity prices - out of our reach!

My family & I have been tortured for years by the scandalous RenewaBULL hoax with Elgin's Public Health & Safety Risk plan threatening my family's life sustaining, essential Food & water supply which will inevitably be contaminated, with foolish, money hungry host pariahs left with a pile of toxic junk they can't afford to remove - Bathurst Council & Ratepayers unjustly left responsible/liable due to the Department's Risky Moral Hazard inflicted if approved - for the resulting serious/irreversible heavy metal contamination/pollution & toxic lithium Battery residue they & previous IPCN panels have to date irresponsibly refused to consider & assess during the operational life of Industrialised Solar & BESS.

Our iconic rural outlooks, rich biodiversity & limited irreplaceable uncontaminated arable land - our rich soil heritage & vital water supplies - including the catchment area for Saltwater Creek which we are required to hand on to future generations in equal if not better condition than we have been blessed to receive them in are under attack by the Government's ECOCIDAL ideological agenda!

This is well documented with evidence of extensive Environmental Destruction caused by irresponsible Solar Approvals & the typically irresponsible Construction processes of Solar developers whose primary focus is Fake Green Subsidy Money which is ripping us all off through our ever skyrocketing Electricity Bills.

The series of Solar's Environmental Destruction **6 Photos** shows the Water run-off/Erosion disaster here at Bomen/Eunony Valley with litigation of the Host pending as the distressed neighbour lost his whole year's income - with his crops all killed, his property inaccessible for 6 months & essential questions never answered prior to approval, Conditions never met & no one taking any responsibility to remedy this dodgy Fake Green Solar Nightmare that should never have been approved.

Add to this the 5 Damaged/Hail

Fractured Solar Panel/Hail **Photos** - or inevitable catastrophic Fire Smoke event & our Australian grown Canola as at Glanmire - producing paddock to plate Goodrop Oil **Photo 35** & our & our children's & future generation's health & safety is put at serious risk!

Photo 36 'If Clouds Could Talk - the Finger of God in Righteous Anger' photo represents how wrong, inappropriate, totally illogical & how consequential to our essential Food Bowls Elgin's contaminating Solar/Battery Plan would be!

None of the Aims & Objectives of NSW Climate Change Bills, Strategies, RenewaBULL Targets or Claims of Reliable, Affordable, Minimises Costs, Sustainable, Emissions Reduction, increased Efficiency, Economic Growth, Competitiveness, Secure Energy, Does Not Give Rise to Moral Hazard, returning Industrialised Solar sites to their inherent capability, enhancing the natural resource base or being highly reversible are being met or ever will be met as the heart of Solar panel processing is CO2!

The Fake Green Industrialised Solar/Wind is a Transition to Extinction - the Antithesis of Caring for Country & Genuine Sustainability - a financial train wreck - a manipulated, brazenly deceptive LIE based on fudged costings designed to control & deprive people, reduce productive Australian industry, benefit the off-shore multi-national generators & rip-off everyday Australian consumers!

THIS IS NOT FOR THE GREATER GOOD!!

****Solar farm runoff pollutes property, couple awarded \$135 million - CFACT
Sediment Run-Off Contaminating Land/Water - Court Case -
“Created, Operated, and Maintained a Nuisance”**

**Solar farm runoff pollutes property, couple awarded \$135 million - CFACT

By [Bonner Cohen, Ph. D.](#) | June 6th, 2023

NSW Fire & Rescue have advised me that they have done no research whatsoever regarding industrialised Solar Risks - yet this dangerous, delusional RenewaBULL EXPERIMENT- that is now threatening our lives throughout rural Australia is being irresponsibly inflicted on us without our Consent!

“There is a general lack of guidance and provisions in building codes, standards, and legislation in relation to safety to address the potential risks from these emerging technologies. Part of the problem is that we do not yet know enough about their probability of failure, their mechanisms of failure and potential consequences of failure.”
