Subject: Submission opposing Hills of Gold Wind farm - April Blackwell
Date: Saturday, 10 February 2024 6:09:31 PM

I have not received confirmation that my submission was received.
Enclose screen shots of submission.

I have been a resident of Nundle for over 30 years, I have a number of objections to the development including the fact that I'm a cancer sufferer and I'm concerned regarding emergency access through our one road in and out of town during construction.

Also I was actively involved in gold mining for a number of years and I want point out that the area you call Black Snake area and around Two Mile Walk under hanging rock is peppered with shafts, tunnels and underground lakes. There are tunnels traversing underground either side of Devils Elbow, and it's unknown how stable they are.

~~Given the amount and weight that~~
road would be expected to carry it certainly seems advisable to thoroughly investigate how this would impact the road. I haven't seen that the proponent has investigated this or if the Mines department have been consulted. They of course would have underground mapping of the whole area.

I would like to reiterate the fact that access to the town is unique in that it is one road in one road out. It is used for all the towns vital services. To clog this up in the manner proposed will have a huge effect on the life and daily existence of the occupants of this place. Thank you
