Subject: Re submission of submission for Hills of gold wind farm
Date: Wednesday, 14 February 2024 9:34:58 PM

I am opposed to this development being a land owner due to the visual and noise impacts that will be caused by the installation of the wind turbines, and the adverse effects to biodiversity, example the loss of birdlife and animal habitat, as well as the traffic issues caused by the increased amount of vehicle movements and possible loss of property access and or isolation due for the need to upgrade local bridges and local road infrastructure to handle the proposed size and weights of items to be transported through the local area during construction causing disruption to day to day life.
