---

To whom this may concern,

I would like to object to the Hills of Gold wind farm project. The whole project would be detrimental to the Hanging Rock area both to flora and fauna. According to the new amendments, privately owned land would be voluntarily acquired by Engie, which sounds corrupt and illegal. Building all these wind turbines would also negatively affect many of the land owners in the area. These turbines would affect the land owners' quality of life. The transport routes that were recommended for transporting the wind turbines are insufficient and would outweigh the cost of energy produced in the future.

Regards

Gergely Kocon
