

## **HILLS OF GOLD WIND FARM REJECTION**

I Reject the proposed Hills of Gold Wind Farm based on the following reasons:

- Unsuitable terrain
- Damage to local ecosystems and endangered fauna
- Improper planning and selection of transport routes
- Planned damages to significant local landmarks
- Damage to local waterways
- Increased risk of landslides due to unsuitable soil
- Loss of natural beauty leading to crash in tourism
- Further community and social damages
- Flawed design and unclear resolutions of important local opposition
- Previous Illegal clearing and future planned clearing of native vegetation
- Geography, project neighbours national parks
- Negative effect on local primary producers / agriculture
