I am writing to strongly oppose the reinstatement of the turbines and the negative visual impact that they will have on the neighbour's property and our community living in the valley below. The previous rationale opposing and removing these turbines from the project are still very much valid. The area has been reported as very unstable. This will greatly impact the water retention and this has not changed and the wildlife very much need to be protected.

The negative effect it will impose on the value of nearby property (DAD1) will be devastating to the current owners. The proposed voluntary acquisition places a burden on the owner of the property and is an invasion of landholders rights. The impacts being imposed on this land owner amount to him being forced out of his own property.

This project is a monumental environmental disaster.

I oppose any reinstatement of wind turbines or any acquisition of land in this project.

This project should be rejected and deemed unviable.

Sincerely,
June Burr
