Re: Submission against the Hills of Gold Wind project – SD9679

We vehemently object to the Hills of Gold Wind project.

The Hills of Gold are a beautiful, pristine environment that will be devastated by the installation of massive steel and concrete turbines. These monsters have a short shelf life, massive footprint and will be obsolete before they are even installed and operational.

The Hills of Gold is a tourist destination due to the beauty of the area – turning this into an industrial landscape will end that.

Increasing the amount of turbines to placate a foreign owned company is shocking and goes to show that community concerns are readily dismissed for monetary gain.

Do not approve this project, put the concerns of the community first along with the environment.

Yours faithfully
Ken & Michelle Park
