**Subject:** Nundle/Hanging Rock Wind Farm Proposal

Hi, this is my submission to advise my disagreement to the proposed wind farm on the following grounds.

1. The proposed 67 wind turbines are a significant threat to the local environment regarding potential devastation of native fauna, potential forest fires, inadequate access to proposed site
2. Noise pollution to local residents.
3. Negative impact on local tourist industry
4. Negative impact on Tamworth drinking water
5. No guarantee to restore site to original condition at end of life of proposed wind farm.
6. Wind Farms are inefficient and would not be viable without significant tax payer subsidies.
7. Other long term power generation solutions at less cost to the community over the next 100 years will be implemented within the next 20 years
