

I Object to new information on the Independent Planning Commission website for Hills of Gold Wind Farm.

No progress has been made in answering the concerns of neighbours, community, Council or scientists' peer reviews.

Please value the biodiversity, soil and rainfall captured and held on the range on land proposed for clearing on the wind farm site, and biodiversity in the national parks on neighbouring land.

This cannot be mitigated or offset for my generation or future generations.

There is no such thing as no net biodiversity loss.

Clearing for Hills of Gold Wind Farm, potential increased erosion, sedimentation and mass movement, reduced infiltration, and indirect impacts on Ben Halls Gap Nature Reserve and Crawney Pass National Park are not a Public Benefit.

I give permission for my submission to be emailed on my behalf.

Please remove my personal details.
