Subject: Cease and Desist Hills of Gold Wind Farm Immediately and Do So.
Date: Monday, 15 July 2024 4:22:58 PM

Hills of Gold wind farm application (SSD-9679)

HoG Wind farm, proposed on lands *with remnant woodlands adjacent to National Parks and Reserves such as the Crawney Pass National Park and Ben Halls Gap National Park containing the critically endangered endemic species of Sphagnum Moss Cool Climate Rainforest, Cease and Desist Immediately*. These woodlands serve as critically important connectivity corridors for wildlife.

Wind farms adjacent to World Heritage Wilderness Areas, National Parks and Nature Reserves throughout Australia Cease and Desist NOW.

Climate Refugia leave Well Alone for the Forever time frame or we lose Our Wildlife. We Must offer Care for Country Care to the All On Country Way. International Inquiry I Demand Demand Demand Immediately into 3 Bladed Wind Turbines/Farms Harming and Causing Loss To:

- a) Wedgetail eagles
- b) Communities eg Nundle, a tourist town well known to the wider community, who visit it to escape the larger town Tamworth, regularly.
- c) Corridors of High Importance to Australia's Endangered Species, forgotten, aren't they gov.au, Why ? Why ? Climate Refugia GROW gov.au, as in place Significant Climate Refugia under Protection Immediately, Immediately, Immediately
- d) Endangered Marsupials who live in hollows of older trees, not on Saplings, eh gov.au, Unaware, Absolutely, of Lifestyle Marsupial they Threaten, "they" being:

Gov.au, and ShareMARKET WHO Control us Aussies, well well well, hey hey hey, How Dare You gov.au.

How Dare You gov.au, backflip on a serious issue, which is serious for:

Nundle Community, including Endangered Marsupials protected NO Hey Why gov.au.

I Demand an Immediate Moratorium on Hills of Gold Wind Farm, a 3 Bladed Wind Turbines/Farm proposed between Crawney Pass National Park and Ben Halls Gap National Park, Nundle region, a 1200-1400m high, EXTREMELY STEEP and HEAVILY timbered area of the Great Divide under Threat from Renewables, On Country On Farmlands In Wilderness, INSTEAD OF On ROOFTOPS ONLY, which they CAN be, Every single one of them, BLADELESS TURBINES of course, of Course, and tubes of glass, NB tubes, Highly efficient and recyclable – recyclable.
ridges in between two

64 skyscrapers on top of a 1200-1400m high, extremely steep and heavily timbered ridges in between two National Parks, Crawney Pass National Park and Ben Halls Gap National Park - Habitat to endangered and threatened species – IS LUDICROUS.

You get away with it, don't you gov.au, and I need you in an Investigation Immediately, which Includes, CSIRO, AEMO, IPC, and an Independent Expert Panel for Energy Transition (IEAPET) – “Independent” RUBBISH, WHAT RUBBISH.

I Demand a International Inquiry into: Australia , Foreign Owned, Without Our Knowledge, Permission or Consent, Our being Aussies fighting for Justice, YES Justice, Justice, but Unable to, Hey, gov.au.

We will be owned by International Sharemarket Will we, hey ? If you continue in this path you may find a very unwell future.

A very unwell future.

In Nundle is a Very Precious area not even in the Application, hmm. Interesting isn't it, how you DISinform community re Renewables, including Tribal and gov.au Mob, yes Mob, Not Fighting the Hills of Gold application, Why ? Don't you know what's there, or do you, gov.au ? You should.

It's Catchment area to Tamworth Water Supply, did you know. I don't think so.

Catchment area to a growing City. And you, gov.au, will Impact it, and will, yes will, and don't Know that ? Dear oh Dear.

Tribal are ? Answer me.

Gov.au Mob are who ? Give me a reply, and I need one for my International Inquiry.

Mob should have stopped this development you see.

Why haven't they ? Cease and Desist a application for sky scraper high 3 Bladed Wind Turbines on Top of

the Ridgelines Nundle, a Significant region known to hmmm, but Not Protected, Why ? Should be, Between 2 Protected areas Crawney Pass National Park and Ben Halls Gap National Park, **National Parks** at that. Who is Responsible for enabling Wind Turbines sky scraper high with 3 Blades on **Extremely Steep and Heavily Timbered ridges in between two National Parks, Crawney Pass National Park and Ben Halls Gap National Park.**

As a 20 year old I Walked this Land looking for Endangered Greater Glider. Well, aren't they STILL Endangered, and this is a Very Serious Issue being gov.au Unable to Protect Endangered Species and their RARE, yes RARE, yes RARE, Hollows. Hollows. Homes. Homes. In Ancient trees no-one Cares for, Why gov.au.

Legislation is it, **1979** ! I Do need government to Cease planning OUR Future Immediately, because they Harm and Cause Loss Continually to Environment All On Country Environment we, community local and Australia wide, Cannot Stop. I ADORE the Marsupials of EON EVOLVED evolution I Demand Receive Protection Immediately, as New Legislation implemented Immediately, as Renewables On Country On Farmlands In Wilderness **Cease and Desist**, and Care for Country Care To The All On Country practice offers ROOFTOPS ONLY for renewables, including BLADELESS turbines.

Engie, an international company, will Profit from generous government subsidies whilst Causing Loss To:

- a) Habitat
- b) Birds that Fly, yes Fly, Hey Fly, Yes Birds Fly, and I don't know if gov.au know that, and IF they do then they are Complicit in Harm and Loss to:
 - 1) International Wildlife, Original.
 - 2) Soul Purpose of Humanity upon Earth, Mother Earth.

2.4 Biodiversity Impacts

DPHI has noted that **additional clearing will be required to accommodate T28**, and that the developer has offered **an increase in biodiversity offset credits to compensate for this further clearing**, whilst endangering EECs in the local area, Koala, Greater Glider and Marsupials and Birds dependent on HOLLOWs as HOMES to live in and Breed in.

The clearing for the whole development footprint **will be offset through the Biodiversity Offset Scheme**, a THREAT to Our Australian Wildlife, Correct, Correct. **Hollow-Nesting Fauna**

NEED Hollows present not absent. The Biodiversity Offset Scheme is made to support development not Protect Australian fauna and Flora. Destroying Habitat Must Cease, and we can do better than that by offering Renewables On ROOFTOPS ONLY, can't we gov.au, Yes. But no amount of biodiversity offsets credits will ever bring these poor creatures back to life or replace their breeding habitat with 'like for like'. This incongruous scheme, which allows wilful damage in one location to be offset by investment in biodiversity elsewhere, is seriously flawed in many aspects and is in urgent need of review, particularly with

How Dare You All, gov.au.

I cannot understand you, in government supporting renewables On Country On Farmlands In Wilderness where Our Endangered Species You Threaten, Yes You, You, gov.au, you. You get away with it. Time that Stopped, isn't it.

I Demand a International Inquiry into 3 Bladed Wind Turbines/Farms I Have to have Ceasing On Earth NOW. Europe have No Care for Life, L i f e. Some of us Do. We need a New government immediately.

On my Walks in the Nundle area are Eagles, Masters on Earth. Eagles are Masters On Earth.

Protect them Please – Eagles, Masters on Earth.

1979 Legislation must be Updated Immediately, and a Moratorium on 3 Bladed Wind Turbines/farms Must be Enforced Immediately. My own experience in the Ben Halls Gap area is searching for Endangered Greater Glider, Endangered More than Ever before now, Why ? It's a Serious Issue you see.

Time it Ceased isn't it – Harm and Loss to Environment All On Country Environment, for NO reason, being renewables On Country On Farmland In Wildlerness INSTEAD OF on ROOFTOPS ONLY, and a far CHEAPER option, Without Harm and Loss to Environment All On Country Environment, being the Catchment area of Tamworth area, a Large City, growing.

Engie, profit. Nundle region loses, Locals lose, Wildlife Lose, Endangered Species Lose, for NO reason but a company to make Profit. Bit Unfair isn't it, isn't it.

I say Cease and Desist Engie in Australia, and ask for an Investigation into Renewables Right Now.

Now. It's OUTRAGEOUS - the Habitat Loss from renewables projects. I Do Demand a Moratorium into 3 Bladed Wind Turbines/Farms.

I Demand All renewables be On ROOFTOPS ONLY From this MOMENT NOW.

POOR SITE SELECTION - Extremely steep terrain with associated extreme access problems, Why ? Use ROOFTOPS ONLY for All Renewables, including Bladeless Turbines of course.

Site costs above the average, which on this site will be well above the average, is a Reason to Cease and Desist Hills of Gold proposal Right Now.

Let's see.

DPHI had *recommended* deleting 15 turbines, *then what happened, hmm?* I Demand an Investigation Immediately, to be Able to Offer Locals Peace, Wellbeing, and Wildlife Protection.

Engie, a multinational company, Benefit from Harm and Loss, Why ? Why did DPHI seek advice from IEAPET to examine the Applicants claim that the project is commercially unviable without reinstating 15 turbines DPHI *had recommended deleting*.

The supposedly "Independent" IEAPET suggests the project is only commercially viable with 62 turbines, DPHI *had recommended deleting*, by using modeling "*not a perfect representation of reality and there are a range of factors not captured by the model that could make other scenarios viable*".

For God's Sake I Demand a International Inquiry Immediately, before we lose Our Wildlife FOR NO REASON !

One day in government the people supporting a issue may be under investigation.

I need a Investigation Immediately, because WILDLIFE are Under Threat, MORE THAN EVER BEFORE, WHY ? For NO Reason, NO Reason. I Demand All Renewables Be On ROOFTOPS ONLY From Now.

Care for Country and All On Country gov.au, and Cease and Desist Hills of Gold Wind Farm Immediately, and Do so, thank you.

My very day researching government has awoken me. I Demand these things:

FIRSTLY – Change Legislation 1979 Right Now. It's easy. Protect Habitats of Endangered Species. That's CLEAR isn't it, yes it is.

Secondly. Cease and Desist 3 Bladed Wind Turbines/farms Immediately in Australia and Worldwide PLEASE.

Thirdly. Renewables are to be SOLELY On ROOFTOPS ONLY to Offer the Greatest Benefit to All Concerned.

This is ***REALITY - Considerable and Mounting economic, social, climate environmental, Catchments environmental, Habitats environmental, Flying Mammals and Birds environmental, State Significant Sacred Sites Environment Cost to future generations All, All On Country All, Cost to rural communities, under planning***

departments **POOR** planning.

For God's Sake, put Renewables on ROOFTOPS ONLY, and KEEP COSTS DOWN, for God's sake, yes.

Another issue not costed out is Devaluation to neighbouring properties (on average 40% devaluation. Is this a SCAM. Absolutely. Who do you think you are gov.au ? How Dare you. Put Renewables On ROOFTOPS ONLY and Cease and Desist All 3 Bladed Wind Turbine Projects Immediatley, and SAVE:

- Endangered Species
- EEC – Endangered Ecological Communities – Vital Climate Refugia of Necessity now, in the renewables drive to DESTROY these communities for NO reason, NO reason, NO reason, None.
- Communities
- Farmers
- Environment All On Country Environment
- Catchments
- Money

NEXT 8 GENERATIONS
NEED Our Farmland
CEASE & DESIST Renewables On Farmland
USE ROOFTOPS
