

HILLS OF GOLD WIND FARM

SSD-9679

Nundle Crawney Hanging Rock NSW 2340

I am writing to OBJECT to the construction of the Hills of Gold Wind Farm.

As Australians we must trust the decisions that the Australian Government makes especially when it comes to meeting the required regulations at the time of any development and as Australians, we must all live by these governing rules.

This ensures that there is a fair and equal democracy in place for all.

However, when the Australian Government choose to consider moving the goal posts required on any (and especially this development) when the final whistle is about to be blown to accommodate the wants and needs at the request of an overseas developer, I find this out of the realm of a democratic society and more like a communist country's idealism.

If the development does not meet the requirements for additional 17 wind turbines, then simply IT DOES NOT MEET THE REQUIREMENTS and should not be approved on this farmland that should be preserved for future generations.

FARM MEANING

- 1. make one's living by growing crops or keeping livestock.**
- 2. HISTORICAL- allow someone to collect and keep the revenues from (a tax) on payment of a fee.**

As a department of the Australian people, I request that NSW Independent Planning Commission please govern within the guidelines of the Australian Law required for developments on this pristine farm used for keeping livestock and especially as the word farm in the term wind-farm applies to allowing someone to collect and keep the revenues on payment of a fee which I find offensive and totally un-Australian.

Once the land is gone, it can never be replaced.

Concerned resident.

Tamworth NSW - 15th July, 2024
