Please accept my submission on PROJECT SSD 9679 Hills of Gold Windfarm New Material.

I do not wish my name or address to be published.

SUBMISSION ON PROJECT SSD 9679 HILLS OF GOLD WINDFARM NEW MATERIAL

I support the proponent, Engie's request for the approval of 62 turbines to be included in the Hills of Gold Windfarm. Engie has clearly explained that a 47 turbine windfarm would be unviable because the 15 turbines removed would be the most productive turbines in the project.

The removal any turbine from this project because of a "phantom dwelling" is spurious and would create an unethical precedent in further project approvals.

Please approve 62 turbines in the Hills of Gold Windfarm
