Subject: Hills Of Gold Windfarm OBJECTION
Date: Monday, 15 July 2024 11:56:25 AM

I wish to formally and strongly oppose, AGAIN, the reinstatement of the turbines for the Hills of Gold Windfarm proposal. These will have direct visual impact on our property and in addition our community has been opposing this as a majority for many years, yet we are still here in this environmental disaster of a project.

The proposed site has been proven to be unstable. The proposed transport routes will directly affect my property and I strongly object to this route on Crawney Road. The wildlife and Reserve this plans to impact will have grave consequences to our delicate habitat and bio diversity which we are fighting to protect. We need to protect the future of our water security and this project will greatly impact that for our future.

I am fearful if these turbines cause a bush fire and how this will be managed for the safety of the wildlife and the community.

The current proposition affecting (DAD1) the neighbouring property, is a disgrace and will impact this owners livelihood. You are proposing to force him out of his own property.

Our family and community are exhausted by all of the opportunities the proponent has to keep proving this project to go ahead, when on so many levels we have proven it is the WRONG LOCATION.

Shame on you.
