TO WHOM IT MAY CONCERN

RE: HILLS OF GOLD WIND FARM APPLICATION NO. SSD 9679

- I hereby declare that I object to the reinstatement of 15 turbines in the Hills of Gold Windfarm proposal ID no. SSD 9679
- I would like my personal details withheld

Signature

Objection

I hereby declare that I strongly object to the reinstatement of 15 turbines to the Hills of Gold Windfarm proposal.

My concern is soil movement and degrading of the hillsides which is has already been heavily cleared. I have seen from our cottage the extensive clearing that has been done in recent years. Further clearing to this area is excessive and risk danger of landslips an additional 15 turbines will only add to the danger. The risk in destroying the existing ecosystem on that range is also my objection. Ben Halls Gap is up there where the turbines are to be built. That is a nature conservation area and should be protected.

I also have concerns about the economics of the project given the high costs of all developments at the moment. What happens when the the developer does not make any money ?? Am I left to look at the towers

Reject this project for the good of the environment and Nundle community.
