Subject: Objection to the new recommendation to the Hills of Gold Windfarm
To: <submissions@ipc.nsw.gov.com.au>

I am writing to confirm my continued objection to the proposed development of the Hills of Gold Windfarm.

Can we please be fair and reasonable with this obnoxious proposal from engie and our ridiculous dpi.

Neither have responded to any questions or issues throughout this process, nor abided by any of the guidelines set.

Still no access route

No contact to adjacent land owners

No contact with local RFS brigade or District FCC.

We are not asking for any compensation for all the unnecessary stress and heartache over the years just that this proposal be dismissed and that it can never be revisited again

Vladimir Vlasoff

OBJECTION

I object to the above-mentioned project, the new recommendations do not address the public concerns. The locals are being robbed of their rights to enjoy their own land. They are being robbed of their safety - high fire risks, they are robbed of their ability to finish their dwellings and live in peace. No environmental issues have been addressed adequately
