## *A Cairns*

 **NSW 2365**

***Cease*** and Desist a Wind power plant in the Namoi Upper Tributary Catchments Immediately. ***Cease*** and Desist Thunderbolts Wind Farm SSD-18087896 in the Kentucky Balala Sacred grounds of the Upper Tributary Catchments of the Namoi River System, Now.

It goes ***against*** the United Nations Sustainable Development Goal 15 to protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, ***combat desertification, and halt and reverse land degradation and halt biodiversity loss.***

We have a Need to Research **Impacts** from **3 Bladed Wind farms** On Country now, upon a Dry Continent, Australia, unlike any on Planet Earth. Unlike any other Continent upon Planet Earth.

Why are governments worldwide enabling 3 Bladed Wind Turbines please ?

Why ?

Renewables are unable.

Renewables interfere with the Atmosphere in a Dry Continent and upon a Planet, **losing Life and Land** to the infrastructure proposed upon Earth, NB, Earth.

3 Bladed Wind Turbines en masse upon Earth are Killing, en masse, bird populations and bat populations worldwide as well as in Australia. Read that again.

3 Bladed Wind Turbines en masse upon Earth are Killing, en masse, bird populations and bat populations worldwide as well as in Australia.

***Cease*** and Desist 3 Bladed Wind Turbines on Planet Earth.

Now.

I said Now. I say Now.

Masters on Earth are Raptors. Raptors. Eagles. Rare, yes, are Raptors on Planet Earth, yes, on Planet Earth. Yet governments completely ignore this issue, and will not **Cease** and Desist 3 Bladed Wind Turbines. Why ? They have No Care for Life, you see.

That is not how you treat Rare Wildlife, you see. You can Care for Wildlife by Ceasing and Desisting 3 Bladed Wind power plants.

One day a word will be noticed.

One word.

**Cease**. Notice it now. Thank you.

If the world could actually Care about Life for once, for once, can it be from now. Thank you.

Life is Precious. Rare. Endangered. While we Populate and Demand More and More, not Less and even Less, in a time frame over 8 Decades.

Over 8 Decades, Humanity has Completely changed a Planet, and it is a Planet. Planet Earth. The Only one With Life. The Only one you see, with Life. Are we going to destroy **More** areas to build the **Unreliables** Wind and solar are. They are. Why do we not use Coal in brand new power stations, like China and India build to make Infrastructure no-one needs all over the Land. NSW only needs 5 new power stations using Coal. Just 5. Five. Compare Renewables infrastructure where , to where, until when ? They are **Unable**. They are. They will never do anything but **Destroy Wilderness , and rural regions**, where Peace and Quiet have been present for innumerable time frames. Eons even. God Help us Stop These Things, Renewables, please, God, please, God, please. Care for Life please God. Tell them to Stop These Things please, that Harm both Environment and Life, Rare, Endangered and Vulnerable, and people's lives, lives.

Understand how many will be needed , these Things with 3 Blades, that Harm and Destroy Environment, into lower Catchment areas, into

Wildlife as Birds and Bats **that Fly in areas Humanity do not.**

God. Help those in government Understand what 3 Bladed Wind Turbines do to the Environment, All On Country Environment. Them ? Government. And Sharemarket. These two. Unaware of the Harm and Loss they offer this Dry Continent, Australia. Australia, a Dry Continent government and Sharemarket have No understanding of. **Cease** and Desist Renewables On Country, On Farmland, In Wilderness in a Dry Continent, harming Wildlife.

I Demand a **Moratorium**, at least, on Renewables. I need Renewables to **Cease** now. Coal is the Future IF China and India gets Rights to Australian Coal, going Offshore, and en masse. Why ? This is Ludicrous and a Crime Against Endangered species and Future Endangered to Critically Endangered species I Pray will not be Extinct For No Reason, For No Reason.

I have a understanding of my region, New England. Where Vital Upper Tributary Catchments begin, NB, begin. To Namoi, Gwydir areas you see. Where Farmers need absolute Respect from government, Australian to State, who follow, yes follow an Agenda inappropriate for this Dry Continent, Australia. Yes, Australia, unlike any other Continent on Earth. Read that please. And again. The Driest Continent on Earth. Not even acknowledged by those in government here and in a global world of Harm and Loss to Environment, All On Country Environment, worldwide. I am Ashamed of government, Australian and State, local, mayors in my region who will not listen to those paying Rates and Supporting Australian Economy who Protest Renewables.

What is it wrong with the Country, Australia ?

We are Sold. How Dare You All.

What are you Doing to Our Nation ? I need an inquiry you see. It has to be a Royal Commission to get the Truth out, yes the Truth. This is Serious and you Ignore it all.

What Are you Doing to Our Nation and Country never yours at all to Harm or Cause Loss upon. No rights it has, this Dry Continent, now corporate controlled by which Nations, please, which ?

Go and get a Good Look at New England area please. Go and have a

Good Look at it please. It has Catchments needing Care and no-one is assisting the Farmers in the ways this Land needs Care for Country **Trees**. Yes, **Trees**. Yes, **Trees**. Many of them. Many.

Subsidise workers, 80,000, in NSW alone, paid to Plant Trees on Farmlands that grow Food for Our Nation. Our Nation. Some of these Farmers are Generational Farmers who Do Care for Country and Do. Assist the All On Country Environment Forever and plant Trees On Country. **Trees. Trees. Trees will assist Balance and Harmony upon a Dry Continent.**

*Cease* and Desist 3 Bladed Wind Farms now.

Some farmers are Absent and accept the proposal of a Wind Farm that will devastate other places and their own. And Wildlife. And Environment. Into Climate of Environment. Prone to Drought and Fires. Do not exacerbate these issues with 3 Bladed Wind Farms.

Birds are Masters being killed for No Reason, for No reason, No reason, None.

To offer harming 3 Bladed Wind power plants On Farmland In the Upper Tributary Catchments of the Namoi River System is wrong.

A court decision handed down in December,2023, has ordered a wind farm be dismantled.

The court decision, handed down by the Court of Appeal in Nimes, France, has ordered the dismantling of a seven-turbine wind farm in Hérault:

<https://www.wind-watch.org/news/2023/12/14/noise-bird-deaths-windfarm-ordered-to-close-for-first-time-in-france/>

*Campaign groups successfully argued that the turbines were causing harm to birds and residents.*

*A windfarm in southern France has been ordered to close due to noise complaints from residents and the effect it is having on birds, in the first closure of its kind in the country.*

*The case centred on several complaints from bird and animal welfare associations about the negative effect the windfarm was having on protected birds in the area, and residents who have complained about noise nuisance from the farm since it first opened in 2016.*

*Last April, one of these rare birds ( Golden Eagle) was found dead at the base of a wind turbine, and the welfare associations estimate that the turbine's blades have been responsible for the death of more than a **thousand** birds in the area.*

*"The golden eagle is unique, it hunts on 150 km<sup>2</sup>, this is its territory," she told BFMTV. "This has mainly been a fight for biodiversity, and that is where we have been vindicated..."*

***Residents in the immediate surrounding area have long complained about the noise from the windfarm.***

In the US, Oklahoma, following yet another lengthy legal battle, the Tulsa judge ruled in favour of the Osage Nation, citing that the turbines constituted a "**continued trespass**". 150 MW of turbines will be removed. At a est. cost of \$300,000 million !

People and Wildlife are On Country and **Living** and Working in the Kentucky Balala region near a proposed Wind power plant. Consider them, please. **Cease and Desist Thunderbolts Wind Farm now.**

If you lived in a quiet peaceful region - region.

If you lived in a quiet peaceful rural, NB, Rural region, then please understand what is going on is wrong re Renewables On Farmland, In Wilderness areas On Farm, and Off Farm ( roadsides, hobby farms), where these areas are Vital for Future Wildlife populations you see.

Wildlife. Consider them into 8 Generations Future please. Please. That's a human 8 Generations you see, not an Eagle's. Under Threat from 3 Bladed Wind Turbines not one government has Ceased. Not one. Not one.

**The New England Vital Upper Tributary Catchments region will be a Vital region climate refugia.** It is cooler country you see. Keep it that way.

A Chinese research study showed **Loss of Soil Moisture over time after implementation of a wind farm.** The study researched a site pre wind farm, post wind farm, and observed **Moisture Loss in soils.**

<https://www.wind-watch.org/news/2023/05/15/wind-farms-lead-to-significant-decrease-in-soil-moisture-study-finds/>

*May 15, 2023. A new study has found that wind farms can have a*

*“significant” impact on soil moisture, and aggravate the soil drying in grassland areas, with impacts on ecosystems.*

*The research, published in peer-reviewed journal, Science of the Total Environment, found that “wind farms significantly reduced soil moisture within the wind farms and in the upwind and downwind directions..... the long-term operation of wind turbines can affect local climates.”*

*“Wind farms aggravate the soil drying in grassland areas, which may have impacts on grassland ecosystems.*

*An earlier study, from 2002, showed that a U.S. region with four of the the world’s largest wind farms **showed an increase in land surface temperature that researchers connected to the effects of the turbines.** The paper, published in Nature Climate Change, used NASA satellite data to show **“that an area of west-central Texas covered by four large wind farms warmed at a rate of 0.72 degrees Celsius per decade relative to nearby regions without wind farms.”***

**Get 3 Bladed Wind Turbines Off a Dry Continent.** What are wind farms doing in Australia, a Dry Continent ? And it is. Australia has no Glaciers. None. Absolutely none. It's a Dry Continent, unlike any other on Earth. Farmers are in this area, Kentucky Balala. Prime Agricultural Land it is. Cease and Desist 3 Bladed Wind Farms in the New England from Now. March 25, 2024, now.

Are we really going to Risk drying out Australian soils, prone to drought already, NB.

Why are Renewables in plan if China and India take our Coal for Infrastructure manufacturing we have No need for, nor does Planet Earth, under Threat again and again and again from government, Ignorant about the Land, The Land.

Cease and Desist Thunderbolts Wind Farm and get the Name removed Now. How Dare a foreign company abuse a name , a Legend it is, being **Thunderbolt**, who **lived in Nature, in solitude, in the Bush**, now under Threat from foreign entity Neoen.

Neoen destroyed a Wilderness region in Far North QLD. The Kaban. View

<https://www.rainforestreserves.org.au/kaban>

*Kaban is one of the most biodiverse regions in Australia and not an appropriate location for an industrial scale wind development. To say this project is “green” is a clear case of “greenwashing” corporate spin”.*

Now Destroyed. Destroyed.

How Dare our government enable Environmentally Destructive infrastructure - 3 Bladed Wind Turbines as "wind farms" - upon the rural landscape into Wilderness areas where Endangered Species still survive.

***Cease*** and Desist Thunderbolts Wind Farm Immediately. And ***Cease*** and Desist 3 Bladed Wind Turbines Right Now on Planet Earth. Now. If you understand Environmental Destruction, then ***Cease*** and Desist wind farms now, from now.

I Vehemently Object to Thunderbolts Wind Farm. I spoke at a IPCN inquiry. At Kentucky Community Hall. I add part of my presentation in this submission. I am Disgusted the community couldn't have a proper say. 5 to 10 minutes to Have a Say, and yet the other entity had Years to prepare an EIS !!! This is a Serious Issue, isn't it, yes. I Demand a Moratorium on Renewables and a Royal Commission on Renewables Immediately.

# NSW Independent Planning Commission approves Bowmans Creek Wind Farm in Hunter region

- The NSW Independent Planning Commission has signed off on a proposal for a \$590 million wind farm in the coal-rich Upper Hunter.
- Ark Energy has received approval to set up 54 turbines east of Muswellbrook, capable of generating 335 megawatts.
- They will be more than 200 metres high.
- The company said it was an "exciting achievement" and it looked forward to contributing to the state's renewable energy targets and helping to drive down wholesale electricity prices.
- The Bowman's Creek wind farm has been controversial in the community, with most of the 130 public submissions made throughout the application process objecting to the project.
- Landholders raised concerns about [noise, visual impacts, bushfire risks and land-clearing in the quiet rural area.](#)
- The planning commission said it decided to approve the wind farm due to the project aligning with the state's energy framework to lower emissions and its proximity to existing transmission networks and regional road and rail corridors.

<https://neoen.com/en/news/2021/neoen-starts-construction-of-kaban-green-power-hub-taking-its-australian-portfolio-past-the-2-gw-milestone/>

*"Dr Maia Schweizer, CleanCo Queensland's CEO said: "CleanCo's agreement to buy wind energy generated by the Kaban Green Power Hub fits right into our unique portfolio of low emissions and renewable energy. We will use it to supply our customers – some of Queensland's largest businesses – with reliable, competitive low-emissions energy. We are proud to tap into Far North Queensland's excellent renewable resources as we support Queensland's 50% Renewable Energy Target." Neoen is also working closely with the Jirrbal people, Traditional Owners of the land on which the project is located, to deliver a range of employment and community development outcomes."*

- **Rainforest Reserves are needing Attention, Attention, Attention.**
- **The Jirrbal people get the Neoen suggesting a deal ? The Jirrbal are fighting for their Country , under Threat from Renewables upon their Custodial Lands, their Custodial Lands.**
- **The Kaban is now destroyed. A Wilderness. Now Destroyed. Members of the IPC are needed to investigate the Kaban and the loss of Wilderness to the Race to implement Renewables as a Profit Making Enterprise, yes, a Profit Making Enterprise, Destroying Wilderness for No reason – No reason – No Reason at all. It's a Issue. It is a Issue. The Race to bring How Many Renewables Projects into Australia when we don't need the power, do we. I need a Royal Commission into Renewables and overhead Transmission Lines this Land does Not need, a Land named Australia. Traditional Owners are a government named entity you see. Custodians are the Mob fighting for Kaban and now Chalumbin in northern QLD Rainforests of high need for QLD, for QLD.**
- **Cease and Desist 3 Bladed Wind Turbines in farms I say are Industrial Sites , times by the number of 3 Bladed Turbines harming the Environment. Harming the Environment. Harming the Environment, yes.**

## <https://www.globalaustralia.gov.au/success-stories/neo-en-net-zero-wind-energy-grids-storage-solutions>

Join Australia's transformation to net zero

Australia is positioning to become a renewable energy superpower. We are building new clean energy industries, expanding export supply chains, upskilling our workforce and forging global and regional partnerships.

This creates significant investment opportunities for global companies looking to expand into net zero industries. Find out more about [investment opportunities in Australia's net zero industries](#)

- At what Cost to Our Environment, Dry Continent.
- Government, Australian, do not know this Continent is Dry. Vital Upper Tributaries in the New England leave be. Cease and Desist Thunderbolts Wind Farm Now, Now, Now, and Demand a Royal Commission into Net Zero, a Farce of a kind that may force into Extinction 18 Species in Australia, that may include Koala and Eucalypts, the Survivor Species of Australian Environment, under Threat from 88 Impacts Australian government ignore, whilst chasing the Net Zero issue I will be Watching ever so closely every day I watch the Increase of Emissions in the Net Zero chase to Net Zero.
- Cease and Desist 3 Bladed Wind Farms Immediately, and put them on Rooftops, or in the Hunter upon the highly damaged mining sites restored but not able as a Catchment.
- I am Disgusted with my government and it's Inability to Care for Country and All On Country. Care for Country is To All On Country, under Threat from the Foreign Market for Renewables I need On Rooftops, and without Blades, and without Impact to Our Lands, Australian, Australian, Australian, in a Dry Continent, unlike Any other On Earth.

# Cease and Desist Net Zero Now

- Get Real.
- Cease and Desist Increase in Emissions via the Renewables Agenda, expanding into Australia until when ?
- Net Zero Cease and let's Care for Country and All On Country and Cease the Chase for Renewables expansion upon a Dry Continent, under Threat, yes, yes yes yes.
- I Demand a Royal Commission into Renewables, expanding upon a Dry Continent that has serious issues with Environmental Impact , going unaddressed whilst Renewables expand, in a so-called chase to Net Zero, a Farce.

# “Thunderbolt”

- How Dare a name of a Legend – Australian – be used for a Wind Farm. I need this name removed and the Project - Thunderbolt's Wind Farm – removed from Upper Tributary Catchments of the Namoi.
- Cease and Desist 3 Bladed Wind Turbines in Australia and WorldWide Now. They harm Environment, and Wildlife, Endangered, Endangered, Endangered.

An aerial photograph of a vast, dense forest. The trees are a mix of green and brown, suggesting a dry or semi-arid environment. In the distance, a range of low mountains or hills is visible under a blue sky with scattered white clouds. The text 'KABAN WIND FARM DISGRACE' is overlaid in white, sans-serif capital letters. A thin white horizontal line is positioned between the words 'KABAN' and 'WIND FARM'.

KABAN  
WIND FARM  
DISGRACE
