NO to the proposed Gundry Solar Farm project.

Dear

I am completely OPPOSED to the proposed Birriwa Solar Farm project.

It's time we stopped big business turning our beautiful land into industrial parks.

Any government and people supporting these intermittent energy generating projects are either ignorant or have vested interests.

The environmental destruction is appalling and the EMBODIED ENERGY in the production of 'renewables' is never mentioned. These are high-tech ventures, nothing 'renewable' about them.

Mining and manufacturing (China using slave labour), high tech components, intermittent energy are inefficient use of resources and a significant END OF LIFE WASTE ISSUE.

The justification: RETs for a large company?

There is NO SOCIAL LICENCE for the destruction of our precious environment.

Wildlife large and small are vital for healthy soil, pollination for plant growth and trees to offset climate change.

They ask nothing of us, look at how wildlife are treated. Never in my lifetime did I expect to see such heartbreaking, wilful destruction.

With regard to 'global warming': solar farms contribute hugely to excess solar radiation. THEY HEAT THE ATMOSPHERE!

Projects like the Birriwa Solar Farm have to be stopped immediately. Nuclear including Small Modular Nuclear is zero emissions - is what developed countries are building now. Cost effective, proven safe and reliable.
