I DO NOT SUPPORT THE BIRRIWA SOLAR FARM PROJECT.

Primary agricultural land should NOT be used for renewable energy infrastructure. This is the land that should be supply the Australian nation with food. NOT intermittent, unreliable and unproven forms of energy.

These projects will destroy rural communities and place significant pressure on those already at their 'edge'. The mental health consequences will be dire with generational farmers/families having their homes/businesses and communities destroyed.

To reiterate what Warrumbungle Shire Council express, there is a significant need to defer determination of the Birriwa Solar project "until such time as the cumulative impacts of more than 40 large scale wind, solar and transmission projects across and adjacent to the Central West Orana REZ are adequately identified and the environmental, social and economic costs are properly compensatedâ€.

The Australian government should be securing Australia's food supply as a matter of national priority. Further, they should NOT be allowing international organisations to control and own our power supply; NOR should WE, the taxpayers, be subsidising these international organisations and/or billionaires for these 'projects'. Anyone who thinks otherwise is a traitor to Australia and needs to be locked up and heavily medicated.

Those wanting these structures in rural Australia do not live anywhere near these 'ideal' locations. Such structures should be built closer to the higher density cities, where those who voted for this garbage live.
