*I believe that the project has good community benefits and offers access to discounted electricity. In the current climate as the cost of living crisis continues to escalate. Having access to discounted electricity would be such a positive impact! I also believe that this project will create countless jobs and those employees will receive training therefore our community benefits. As the cost of living is rising people are looking for more jobs and more ways to earn an income. This is a fantastic project as it requires many people to fill many positions therefore creating more jobs for our the people in our community.*
