I believe the proposed project has great community benefits as it offers access to discounted electricity to many nearby homes. This project creates clean renewable energy which is much needed, whilst still keeping the affected farms in production. It is a good use of the land that may otherwise not be being used to its full potential. It would also create jobs in the area during production and could boost local tourism and income during this time, as more people nearby during construction means more people in the local villages for lunch etc.
