I came into this Elong area when I was married back in 1994. My husband and I ran cattle, sheep and farming. My husband passed away back in 2014. My four children have helped carry on his legacy and are wanting to be farmers. It is a third generation I have living with me who now has to be exposed to wind and solar. This is not fair on him having these deterrents to grow up with. What will happen to his hearing from the noise of the wind farms. We are situated less than 5 km away and were not even notified about the spicers creek case. I live out the back of Elong Elong and feel disgusted that we have been forgotten about. I feel very angry about the whole matter.

I am a widow along with my four children and two grandsons worried about what is going to happen to our land we are using to produce food. How would you like to have this is your back yard!!!!!!
