I object to this project because the true costs of the project have not been disclosed to host landowners. It is not unreasonable to presume that the Applicant company (Spicers Creek Wind Farm Pty Ltd) would pay dividends to the beneficial owner (Squadron Energy) during the operational life of the project but would not have the financial capability to demolish and remove the wind turbines and would be liquidated at decommissioning. Nowhere is there mention of a bond to be paid by the proponents to cover decommissioning costs. The ultimate responsibility to clean up the mess would be the host landowners who more than likely would not have the financial resources to do so. In my view this is misleading and deceptive conduct and should not be condoned by the Consent authorities.
