Topic 1. Sustainability of current and future forestry operations in NSW

Provide continuous wood supply and harmony with ecosystems is crucial for our everyday life.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Our deep connection to the environment and traditional knowledge passed down through generations, helps preserve our unique ecosystem and species that might otherwise be lost. Our cultural practices contribute significantly to maintaining healthy natural environments.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

Private native forests can provide habitats for fish and wildlife, clean water and healthy catchments, store carbon, provide recreational opportunities and provide biodiversity.

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

Research demonstrates that state forests provide opportunities to study and demonstrate natural resource management. Timber production and recreation.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

To prevent global warming, health risks, mental health and loss of ecosystems.
