Topic 1. Sustainability of current and future forestry operations in NSW

Logging of native forests is leading to the extinction of species such as the Greater Glider and the Koala and so cannot be described as sustainable.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

We need healthy forests for holding carbon, cleaning our water, providing habitat, improving fire management, providing recreation, spiritual connection and logging native forests damages all these values.

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Logging public native forests is costing the taxpayer millions and leading to permanent damage to our forests.

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

I fully support an end to native forest logging and a future based on sustainable plantations.
