Topic 1. Sustainability of current and future forestry operations in NSW

I support the the move to end deforestation in NSW and Australia wide.

Wildlife are suffering from removal of there habitat.

We are loosing them at a rapid rate. And they have climate change on top that need these forests to reduce the effects of climate change. Please wake up before it's to late people and politicians.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

I support these.

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

You can find other ways, without deforestation.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

No support

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

Under discussion with first nation people. I support these.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

These all need our urgent attention if we are to make a difference in time.

Time is fast running out for people and Wildlife alike.

Wake up to this now, please.
