Dear Independent Forestry Panel Secretariat

I wish to lodge the following submission on the sustainability of current and future forestry operations in NSW.

Native forest logging operates in NSW to the detriment of the whole State and more widely because of the negative effects on climate experienced nationally and globally .

NSW should show the way with a system of sustainable plantations in order to slow the extinction of species of birds and animals, improve water catchment and generally improve the environment.

Thank you for your consideration of this submission.

Yours Sincerely

Gail Wyatt
