Topic 1. Sustainability of current and future forestry operations in NSW

Our business purchases and utilises sustainable hardwood timber poles on a daily bases. Our timber comes from Coffs Harbor and is grown on sustainable forestry

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

If this change proceeds there will be significant delay in the supply of our products. If we are forced to use composite poles it will triple the cost to install a power pole

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

If this change proceeds there will be significant delay in the supply of our products. If we are forced to use composite poles it will triple the cost to install a power pole
