Topic 1. Sustainability of current and future forestry operations in NSW

Logging of native trees anywhere in Australia must cease immediately. We have already lost too much forest some of which is 1000 years old. We will never see such trees again. So many birds, mammals and insects rely on trees 100% of the time.
Please order logging in native forest to stop before it is too late!!

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Trees are essential for the survival of the human race!!

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Recycle, recycle, recycle !!

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

Timber from Australian or overseas Plantations only please !!

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

There is only one action plan: Stop logging native forests immediately!!

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

Plant native trees, shrubs and grasses.
