**Re: Submission – Forestry Industry Action Plan**

The reasons and data for ending native forest have been made clear by those who are far more knowledgeable and educated than any that I can provide.

I do not have the education to provide any more data or information than that which has been provided by those that do.

I simply endorse those respected ecologists, climate experts, fire experts, economists, conservationists, Traditional Custodian and community forest protectors who have made clear with so much evidence and data that we must end native logging.

What our environment needs is action, not more words ... please stop native logging now.

It is time for doing the right thing, the ethical thing, the sustainable thing that cares for the earth that we live on.

Yours sincerely

*Janeen Scully*
