Topic 1. Sustainability of current and future forestry operations in NSW

I fully support an immediate end to native forest logging and a future industry based on sustainable plantations;

Native forest logging is driving the endangered koala and greater glider to extinction. An immediate logging moratorium should be placed over core greater glider and koala habitat while the FIAP process is underway;

The true value of our native forests comes from their critical role in carbon storage, providing a clean and reliable water supply, providing critical habitat, recreation and spiritual connection.

Logging cannot continue in public native forests without pushing the Koala, Greater Glider, Coastal Emu and many more forest-dependent wildlife much further towards extinction.

Illegal logging practices, endangered species habitat destruction and totally inadequate pre-logging wildlife surveys have become the norm for Forestry Corporation. Under current rules, the volume of logs taken is considered more important than endangered species. This must stop now.
