Topic 1. Sustainability of current and future forestry operations in NSW

We need to immediately end the logging of native forests.

It is clear that we live in a world where we depend on the natural environment : species of animals and plants that depend on each other and that in turn provide us with a liveable Earth.

We can create timber products from planting timber.

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Timber products can and should be produced from planting the appropriate timber .
