**Topic 1. Sustainability of current and future forestry operations in NSW**

Native forest logging is unsustainable as is evidenced by the drastic decline in Greater Glider numbers

---

**Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values**

Forests mean everything for environmental and cultural values

---

**Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail**

91 percent of timber products is currently being met from plantations . There is no point in damaging our forests for our timber supply

---

**Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs**

Put native forest logging tax subsidies into growing further plantations

---

**Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models**

State Forests are essential for the delivery of our environmental, economic and social needs

---

**Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests**

Forests protect us from climate change
