**Topic 1. Sustainability of current and future forestry operations in NSW**

No looking good for any one or anything.

---

**Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values**

You don't care...do you actually know what care means..?

---

**Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail**

Why don't we try Hemp ...a look less evasive on our trees and wildlife..?

---

**Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs**

No it is not ... all timber these days are way to young to be called hardwood....we can find a alternative but it always to hard ...

---

**Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models**

No ...you only have to have a look at where the logging has taken place and if you can not see the damage you need glasses....

---

**Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests**

That would be nice ... but will we ever see it.....
