Topic 1. Sustainability of current and future forestry operations in NSW

Please end the blatant destruction of native forests immediately

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Protect all native species by putting a stop to deforestation.

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Please utilise some of the government land to grow timber.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

How can governments continue to preach about global warming whilst at the same time destroying the lungs of the earth? Trees are an important part of the planets ecosystem. You don't need to be a scientist to know that if all the trees go so do we. Stop destroying the natural world for profit and gain and greed.
