**Topic 1. Sustainability of current and future forestry operations in NSW**

Ok.

---

**Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values**

Good

---

**Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail**

We all need timber for housing, farmers need fences and sheds.  
Governments need timber for rail and bridges.  
This is stupidity to cut supply in our nations biggest housing crisis.

---

**Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs**

They simply can not supply enough timber now or into the foreseeable future.  
That is easy to see , all it will do in increase prices due to lack of supply, making housing affordability go up significantly.

---

**Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models**

I think that should be the decision of local people.

---

**Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests**

---

No. Don't waste our tax dollars!
