Topic 1. Sustainability of current and future forestry operations in NSW

I cannot understand why our political leaders consistently fail to protect wildlife and the habitat and all the creatures therein - this is a very much overlooked issue.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

See above

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Above all, wildlife and its habitat should come first and foremost.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

See above - No.3

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

Heartily See above - No 3.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

Heartily agree to the option above.
