Topic 1. Sustainability of current and future forestry operations in NSW

We are living an unsustainable lifestyle on finite planet, floods are wrecking the planet, in the northern hemisphere. We cannot afford to have the same issues here, Lismore floods, Record bushfires 2019-2022, record heatwaves this spring in Australia. As grandfather I am deeply concerned for my grandchildren's future. Record deaths from heatwaves in Europe, this summer appears will be hotter than ever before, records amounts of greenhouse gases in the Atmosphere, Trees are storing carbon, cutting them down release carbon back into the Atmosphere.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Cutting down Timber is a death sentence for our native Wildlife. Destroying Aboriginal cultural heritage values. .

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

We should planting forest not cutting them down.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

Plantation timber is the future, stop logging native forest.

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

State Forest needs to maximise the environmental economic and social outcomes and including Aboriginal forest management models.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

7 billion people, 1 billion motor vehicles, 65,000 power plants ,36 million commercial flights alone don't affect the planets climate?

You'd think that Australia's political class would be under pressure to come up with solutions to the disaster spreading over nearly 10 million people – about two-fifths of the population – across some 1,000 kilometers (more than 600 miles) from the capital Canberra north to the third-largest city of Brisbane. The air-quality levels for Sydney are currently worse than New Delhi and Beijing.

Wide Brown Land

Australia has some of the world's most polluted cities at the moment
