Topic 1. Sustainability of current and future forestry operations in NSW

I fully support an immediate end to native forest logging and a future industry based on sustainable plantations

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Native forest logging is driving the endangered koala and greater glider to extinction. An immediate logging moratorium should be placed over core greater glider and koala habitat while the FIAP process is underway

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

The true value of our native forests does not come from wood production, but from their critical role in carbon storage, the water cycle, providing critical habitat, reducing fire risk, recreation and spiritual connection

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

Aborigines have, for thousands of years, maintained the woodlands using knowledge learnt over those thousands of years and we should listen to their voices
