Topic 1. Sustainability of current and future forestry operations in NSW

Please end non plantation logging and protect our natural environment

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Sacred sites need to be respected

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Reusing and recycling timber is a partial solution, as well as only using plantation sourced timber

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

We need to outlaw non recycled paper in Australia, this will reduce demand

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

We need to do more to protect our native forests, and indigenous groups are best placed to support in the management of forests both natural and planted

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

We must plant more trees and reduce logging, especially in native forests
