Topic 1. Sustainability of current and future forestry operations in NSW

There is no sustainability. IF you allow for old growth trees us & our children will be dead before any trees planted now can even replace them. I fully support an end to all native forest logging.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Logging of our native forests is leading to the extinction of species, such as the Greater Glider & Koala, & so cannot be described as sustainable in any way. These are not the only animals that are being effected by habitat loss now & into the future. Just look at the "Save Wallum" protest at Brunswick Heads to see how the community feels about forests being ripped down for housing destroying habitat of the Glossy black cockatoo. Any aboriginal cultural heritage show be preserved forever, before they to are lost to all future generations.

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

We need to very quickly transfer to 100% plantation, so that all is required for housing, furniture can be built using this instead of raping our forests of their lungs.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

Climate change will soon be something that we cannot reverse, and every tree that is knocked down, especially old growth, will have a huge detrimental effect on our lives, now & in the future, will effect our mental health when we can no longer walk among these beautiful parcels of land, & leave a disgraceful legacy for our children & grandchildren. We need to act now, it is already almost to late. Go & ask your kids & grandkids what THEY want you to do for their future, and forget about the money that always seems to be the major influence in these decisions sadly. Do it for them!
