Topic 1. Sustainability of current and future forestry operations in NSW

Please accept my submission into the sustainability of current and future forestry operations in NSW. - I fully support an end to native forest logging and a future based on sustainable plantations. - Logging of native forests is leading to the extinction of species, such as the Greater Glider and Koala and so cannot be described as sustainable. - Logging public native forests is costing the taxpayer millions and leading to permanent damage to our forests. - We need healthy forests for holding carbon, cleaning our water, providing habitat, improving fire management, providing recreation, spiritual connection and logging native forests damages all these values.

I fully support an immediate end to native forest logging and a future industry based on sustainable plantations;

Native forest logging is driving the endangered koala and greater glider to extinction. An immediate logging moratorium should be placed over core greater glider and koala habitat while the FIAP process is underway;

The true value of our native forests does not come from wood production, but from their critical role in carbon storage, the water cycle, providing critical habitat, reducing fire risk, recreation and spiritual connection.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Please accept my submission into the sustainability of current and future forestry operations in NSW. - I fully support an end to native forest logging and a future based on sustainable plantations. - Logging of native forests is leading to the extinction of species, such as the Greater Glider and Koala and so cannot be described as sustainable. - Logging public native forests is costing the taxpayer millions and leading to permanent damage to our forests. - We need healthy forests for holding carbon, cleaning our water, providing habitat, improving fire management, providing recreation, spiritual connection and logging native forests damages all these values.

I fully support an immediate end to native forest logging and a future industry based on sustainable plantations;

Native forest logging is driving the endangered koala and greater glider to extinction. An immediate logging moratorium should be placed over core greater glider and koala habitat while the FIAP process is underway;
