## Topic 1. Sustainability of current and future forestry operations in NSW

---

I am calling for the immediate moratorium on the logging of the Bulga State Forest, and ALL native forests. There are inadequate protections for endangered species, including koalas and greater gliders who are known to live in the areas being logged

Forests are worth much more to the people of NSW and the world if they are left standing: they sequester carbon, retain water, home animals, and provide a base for tourism activities.

I oppose the fact that the NSW public is currently subsidising State Forest Corporation to decimate public forests. We need to end logging native forests now!!
