## **Topic 1. Sustainability of current and future forestry operations in NSW**

Logging of native forests is completely UNSustainable. Decades of old growth gone in an instant. Once it's gone, it's gone forever!

---

## **Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values**

Koalas and gliders among many other native animals are at huge risk of becoming extinct. Their habitat is IRREPLACEABLE. You cannot give them an alternative place to live once their homeland has been razed - they will all fie out. Once they are dead, they are gone forever - our future generations will never know these amazing creatures!

---

## **Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail**

PLANTATION TIMBER ONLY!!!!

Limit usage - stop the vast McMansions being built. Smaller is better & much more appropriate!

---

## **Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs**

Plantations must be the only source of timber. We need to revisit the culture of 'less is more'

---

## **Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models**

Forests are for wildlife, people & our environment - NOT LOGGING. We need maximum carbon draw down ASAP!

---

## **Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests**

Leave ALL native forezts alone to do their job - NO LOGGING!
